

Table.xxx BRMS model outputs: Leaf area of northern garden, northern source, southern garden, southern source willows. Model structure per species: (log(LA) ~ population + (1|year)). Model output back-transformed in the table below.

	Estimate	Lower 95% CI (log)	Upper 95% CI (log)	Rhat	Bulk Effective Sample Size	Tail Effective Sample Size	Effect	Sample Size	Species	Lower 95% CI (back transformed)	Upper 95% CI (back transformed)	Estimate transformed
